MobileAdminSite 2007Q2 Installation Guide

Check List before Start

1. You are running Windows 2003
2. This server is a member or domain controller of Active Directory.
3. You have Internet Information Server installed.
4. You have WMI SNMP Provider installed.
   WMI does not load the SNMP provider by default.
   Use the following instructions to install the SNMP provider:
   1. From **Control Panel**, select **Add/Remove Programs**.
   2. Select **Add/Remove Windows Components**, then in **the Windows Components Wizard**, select **Management and Monitoring Tools**.
   3. Select **Simple Network Management Protocol and WMI SNMP Provider**, and then click OK.
   4. Follow the steps in the wizard to complete the installation.
5. You have Microsoft.NET 2.0 Runtime installed.
6. You have a valid license or a trial license for MobileAdminSite.
   To request your trial license go to http://www.mobileadminsite.com/try.aspx.
   To purchase go to http://www.mobileadminsite.com/purchase.aspx.
7. If you need to enable session notification, you will need to make sure your firewall allow outgoing SMTP connection from the server. (TCP Port 25).
   If your mail server uses NAT address, please make sure you assign proper MX record from your mail server.
8. If you have not downloaded the software, go to http://www.mobileadminsite.com/downaload.aspx to download latest version.
