Requirements

Application works on any PalmOS 3.5 (or above) compatible color device. 240 KB Available Ram

How To Install

If you'd ever installed a Palm OS application you should experience no problems installing this Application.

1. 1. Extract all file from the ZIP archive and double click it
 2. 2. "Install Tool" window will appear. Click "Done" button to confirm the installation
 3. 3. HotSync your handheld to complete the installation.
-

Registering

You'll need to know your **user name** which you can find by running MySudoku for Palm, and going into the menu, and selecting the 'Register...' option. Your user name will be filled in for you below.

Register code depends on user name. Capital letters and space is important.

How To Buy

To remove the limitations of demo version you should pay a small registration fee.

On the day of writing this file the price is \$4.99 from <http://mysoftware.com>
