- 6.0 Questions/Comments/Bug Reports**

1.0 General

Thank you for downloading Security Log. We hope you find this application a useful extension to your handheld device. This version of Security Log is a full 8 day trial version. Please email your questions, comments, and bug reports to support@armedforlife.com.

2.0 Installation

The following steps will get you up and running with Security Log.

Option 1 -

1. Double click the .exe file. This should start the installation program. Follow the on screen directions.
2. Place you Palm device in its cradle and perform a HotSync.
3. Next tap on the 'SL' icon to install the app.
4. The Security Log applications are now installed on your handheld and ready for use.

Option 2 -

1. Unzip the files from the .zip/.sit file.
 2. Double click on the .prc file and this should automatically place the file into the Palm installer. Then place you Palm device in its cradle and perform a HotSync.
 3. Next tap on the 'SL' icon to install the app.
 4. The Security Log applications are now installed on your handheld and ready for use.
-

3.0 Uninstalling

On the Palm OS device, use the App->Delete menu command from the applications screen and choose the appropriate title.

4.0 Product Limitations and Requirements

Requires Palm OS 3.5 or greater.

4.5 Manual

Local	IN	OUT	Actv
Back Stora	9:56 am	5:47 pm	Door aj

New

The **Index** shows all the software you have entered. Tap any of the entries to view them. Then you can use the drop down box at the top to sort your titles by category. Use the **up/down** arrows to scroll through your list. The '**New**' button adds new record.

Tap the down arrow across from Locations to pick your location. Depending on which option you have, tap the Time IN blank or the Time IN button to set your time. Depending on which option you have, tap the Time OUT blank or the Time OUT button to set your time. Tap the down arrow across from Activities to select your activity and/or use the space below for a more detailed note.

Preferences

This form allows you to set which clock format you want to use.

You may archive a weeks worth of logs. This will take the current log and assign it to whichever day you choose. Also it will create a new Blank log to start with. If you save it to Monday the new blank log will have Tuesday on it. The same is true in reverse when you reload a log.

Reload	
Reload a Log	Monday's Log
	Tuesday's Log
	Wednesday's Log
	Thursday's Log
	Friday's Log
	Saturday's Log
	Sunday's Log
Back	

If you reload a log it will overwrite the current log in memory. Be sure to save your current log before you load a saved log.

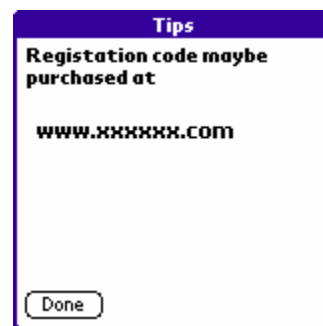

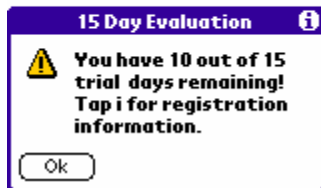

5.0 Registration

Registration is \$14.95 for this program.

Before the trial limit runs you may tap on the 'i' to see where you need to register. Your version may be purchase at the location in the Tips screen as shown below.

Example registration screens below.

Security Log v1.0

You have received a report template (a 12hr and 24hr version) for use with Sand's TBReportViewer program which is provided free of charge. TBReportViewer allows you to print your data from Security Log. TBReportViewer may be downloaded at our website (<http://www.armedforlife.com/products/tbviewer.zip>).

6.0 Questions/Comments/Bug Reports

Please email your questions, comments, and bug reports to support@armedforlife.com.
