1. Introduction

Tones is the first program that pairs a huge database of exciting ringtones for Palm OS with a program that makes it easy to use your ringtones for alarms, reminders, phone ringers, etc.

You can use Tones to set a ringtone in any application that plays system sound files, for example DateBook, Calendar, Clock, Phone, etc.

You can browse and buy ringtones directly from your wirelessly-enabled handheld. Tones also works great and is fun to use on handhelds without a wireless connection.

Tones was developed by NoviiMedia. We are committed to insuring your satisfaction with this application. If you have questions or need assistance, please write to us at service@novii.com and we will be happy to help, or check our website at www.novii.com/tones.

2. Quick Start

Tones allows you to use exciting ringtones on your Palm OS device for alarms, reminders, and in any application that uses system sound files. Just download and install ringtones to your handheld from <http://www.palmone.com/tones>.

Install the Tones application and a few ringtones to your handheld. When you launch the Tones application, you will see the main interface, shown in Figure 1. Note the list of ringtones available on your handheld, including the system sound files which are pre-installed on your device. The ringtones you have downloaded will appear at the top.

Select a ringtone from the main Tones interface. Then click the Use a Tone icon, and a list of applications will appear. Just select an application - for example DateBook, Calendar or WorldClock, or Phone if you have a Palm OS smartphone – then click the Set button. The ringtone will now be used as the default sound for the given application.

Figure 1

You can also select or change the default ringtone by clicking Set on the Use a Tone interface, then clicking any of the ringtones. Ringtones may also be selected by opening the menu of an application that plays system sound files. First, set a ringtone for the application from the Tones interface, then launch the application, and then you can set ringtones right from the Options menu of the given application.

3. Features

- Browse and buy ringtones from the biggest database of ringtone content for Palm OS.
- Choose from thousands of great ringtones – from pop to rock classics, obscure to top-10 hits.
- The Tones player is free. It works great on Treo 600 and other Palm OS smartphones for the phone ringer, SMS messages and more.
- Use the Tones application to set ringtones for alarms, reminders, phone, and for any applications that use system sound files.
- Set ringtones for applications from the Tones interface or from within the application itself.
- Tones provides one convenient place for managing sounds on your device.
- From the main interface, you can review and playback all of the sounds on your device (does not include MP3 files).
- With a wireless-enabled device, you can go right to the Tones Connection to browse and buy ringtones.
- On the Use a Tone interface, you can set ringtones for every application on your device which uses system sound files.
- With your Palm OS smartphone, you can set separate ringtones for known and unknown callers.
- Tones allows you to set alarms to be repeated several times or repeatedly.

4. Install Tones

Please visit the website <http://www.palmone.com/tones> to download the Tones application and to purchase ringtones.

TIP:

First download the free trial version of Tones, and verify that Tones works for you. After positive confirmation, try purchasing some ringtones.

Installation

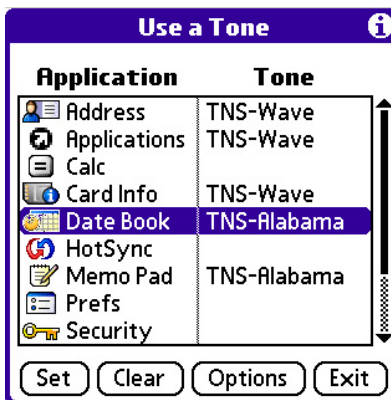

1. Download the zip-file containing Tones software.
2. Extract the files from the downloaded zip-file.
3. Put the file Tones_UserGuide.pdf (this document) into a convenient place, where you can access it again. This is the User Guide in PDF format.
4. Read carefully the end user license agreement for NoviiMedia software, license.txt.
5. Refer to the readme.txt document for info concerning the contents of the zip-file.
6. Install the appropriate prc file to your Palm OS handheld. There are two versions of the program: for Palm OS 5.x or higher, and for Palm OS 3.5 - 4.x. Please verify that you install the correct version.
7. After completing the HotSync operation you can immediately begin using Tones!

5. Using the Tones Application

Click the Use a Tone button on the main interface.

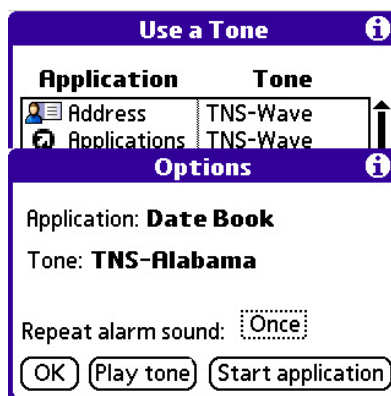

You can use a ringtone in any application that plays system sound files. Just select an application from the Use a Tone interface, click Set, and choose from available ringtones (Figure 2).

Figure 2

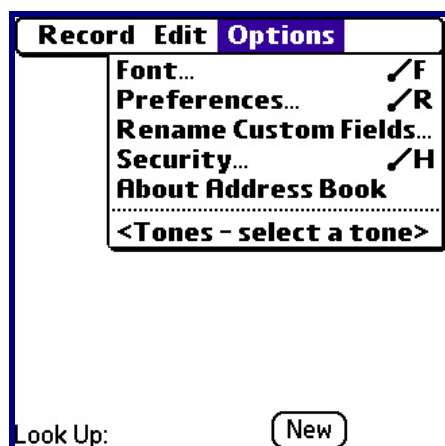

Click the Options button to view the interface in Figure 3. Options allows you to set the number of times the ringtone will play back. Just click in the box next to «Repeat alarm sound» and your choices will appear – once, twice, 5 times, 10 times or forever (until you click on stop or dismiss). You may also play the selected ringtone, or start the application you have selected.

Figure 3

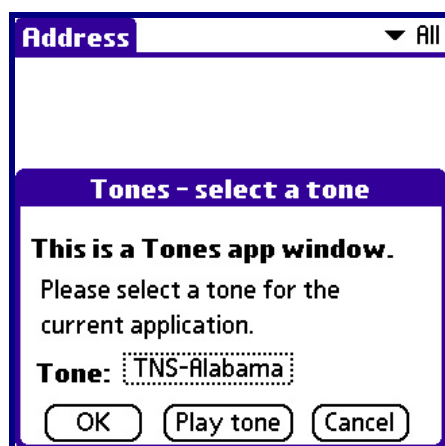

Ringtones may also be selected by opening the menu of an application, for example DateBook. **First, you must set a ringtone for the application as described above.** Then, launch the application, open the menu, and find and click on the menu item «Tones - select a tone» (Figure 4).

Figure 4

A window will appear for choosing ringtones for the given application (Figure 5). Click on the box which says “TNS-Alabama” in the example below, and you will see a list of available ringtones. You can also play back the ringtones from this interface.

Figure 5

6. BUY a Tone

If you have a wirelessly-enabled handheld (a smartphone, Wi-Fi or BlueTooth-enabled handheld with a BlueTooth cellphone connection), you can download ringtones directly to your device.

Press the button «BUY a Tone» on the main interface, and select “Yes, Wireless” if you have a wireless-enabled handheld (Figure 6).

Figure 6

After tapping the button “Yes, Wireless”, the browser on your handheld will launch, and should automatically take you to the Tones Connection at www.handango.com/tones. If you don't reach the correct page automatically, just enter www.handango.com/tones into your browser.

If you don't have a wireless connection, just tap the button «No, HotSync» and visit the Tones Connection on your desktop computer. You can easily download new ringtones to your handheld by visiting <http://www.palmone.com/tones>, and installing the ringtones to your handheld via HotSync.

7. Getting Help

Please review the Tutorials, FAQs, Online Support and other information available on our web site, at www.novii.com/tones.

If you still can't find answers to your questions, please write to us at: service@novii.com
