1. How the manual is organized

This manual guide provides detailed information about the different components of the product, its functions as well as instruction of purchase and support.

Symbol	Descriptions
 Text	Special Notes session
 Text	Menu item
 Text	Introduction of function
 Text	Steps to call the calculator or module
{Enter}	Enter button
<i>Examples:</i>	Example for the current function
The LED	The area of the screen showing expression result and indicators

2. Introduction of HiKeyboard - Your Master Input Method

Multilanguage, Calculator and Full screen Keyboard are all in HiKeyboard now with numerous gigantic features designed to help you use pocket pc effectively.

HiKeyboard - Touch the screen sensitively - Touch the world in a stylish way!

HiKeyboard features:

- Windows Mobile 5.0 and Landscape mode Ready!
- Stylus Free - Rotation of the Full Screen Keyboard
- Support Auto correct and Auto Completion

- Include very nice Arithmetical, Tip, Date and Time Calculator
- Support luna and solar date calculation
- Support both USA and EUROPEAN style for date and numeric separator.
- Support smart keyboard's gestures
- Skinable and sound support

3. Installation And Uninstalltion

3.1. Installation:

Requirements: The product needs **360 KB** of free space in main memory, if you want to install **HiKeyboard Skin**, please check corresponding skin's size. You need to have MS Active Sync Software on your device.

1. Unzip downloaded file to a folder with a zip tool. The popular unzip program **WinZip** is available at www.winzip.com
2. Run setup and follow instructions
3. When finished, go to **SIP** Button then you will see "**HiKeyboard**" in the list

We recommend storing in the Storage Card when the installation asks to select **Main memory** or **Storage Card**.

 You can copy the CAB file to your device and run the CAB file directly but it will automatically install the software to the main memory.

3.2 Uninstallation

To remove the product from your Pocket PC:

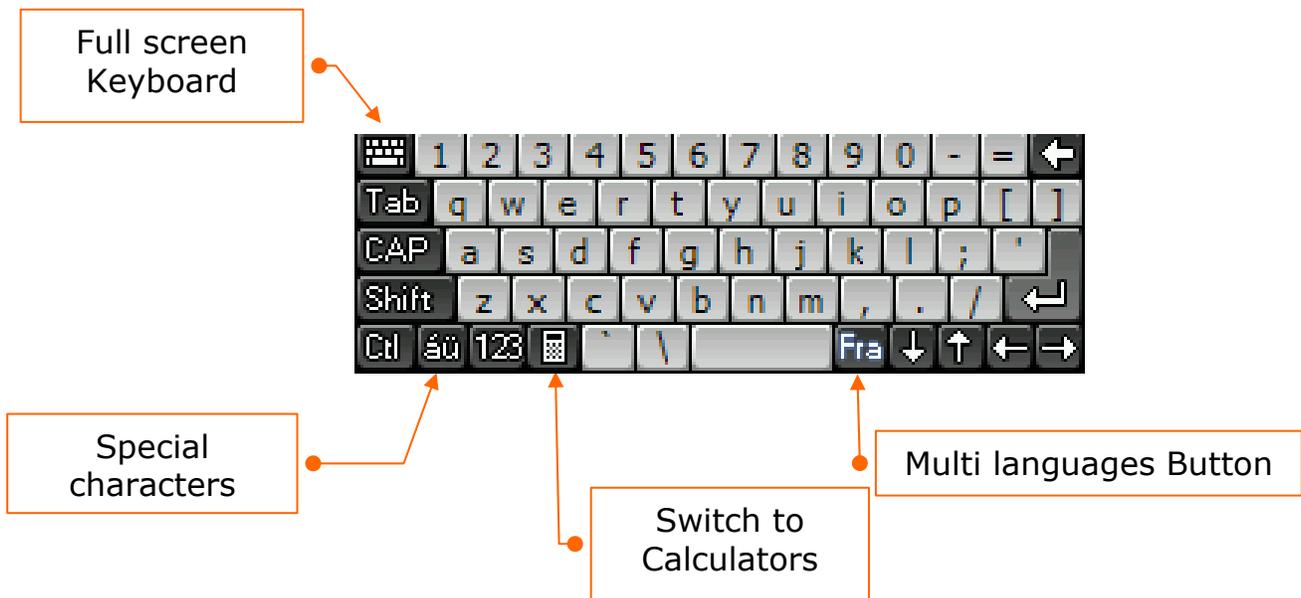

1. Select standard keyboard first
2. Do Soft-reset your device
3. Go to **Start menu >> Settings**
4. Open **System** and tap on **Remove Programs**

5. Select **HIKeyboard** from the list and tap on the **Remove** button then HIKeyboard will be removed.

4. Components of Hikeyboard on Main screen:

- **How to turn Hikeyboard on:**

Choose HiKeyboard from keyboard list the you will see the keyboard as below.

5. Instruction of functions:

5.1 Soft Input Panel(SIP):

5.1.1 How to switch to other language

Hikeyboard improves the capability of Pocket PC keyboard. Normally, you only have a default standard language or bilingual keyboard on your Pocket PC. Let's enjoy the differences with HiKeyboard which

offers up to languages: Vietnamese, Turkish, Thailand, Denmark, Holland, Spanish, Belgium, Uzbekistan, etc.

Tap on "Multilanguages"  button to switch to another language keyboard.

 You can order or adjust languages in HiKeyboard's setting to use it properly.

[5.1.2 How to use AutoText](#)

In stead of wasting your time to type same words or phrases again and again, Auto text feature will save your gold.

For example: you can define

1. LO= Lovely

2. VE= Vegetable

Then when typing LO + {Space}, it will replace **LO** by "**Lovely**" to the document or **VE** + {Space} then **VE** will be replaced by "**Vegetable**".

 Please go to in HiKeyboard options to enable these above features

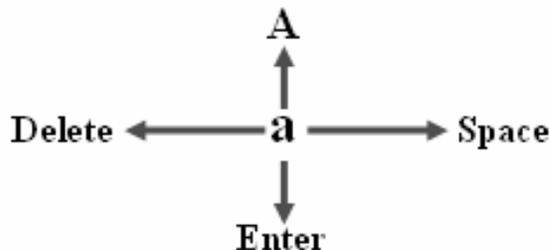

[5.1.3 How to use keyboard's Gestures](#)

No need to tap on many keys at all! Just slide a key and you got all!

These are rules, sliding up is **Shift + key**, sliding down is **Enter** key.

Sliding backwards is **Delete** key and sliding forwards is **Space** key.

You can also delete with a slide on the backspace key. This beside triangle will help you see clearer.

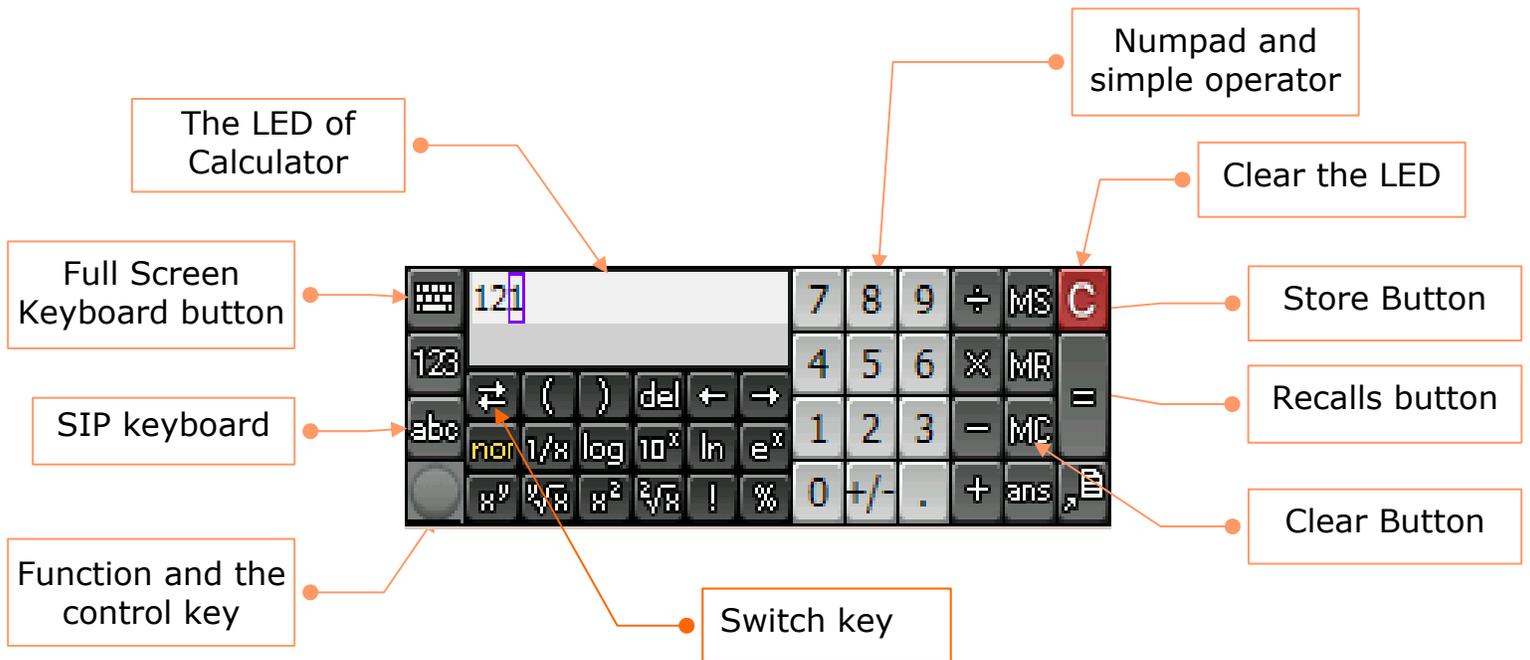

5.2. Calculators of HiKeyboard

What's if you need to complete complicated calculations and input them directly into the document which a traditional keyboard can not help!

Solution comes from HiKeyboard integrated with 3 calculators: **Basic calculator**, **Tip calculator**, and **Date-Time calculator**. Feel free to type with smart HiKeyboard then switch to the calculators for complicated formulas and paste them directly to your document.

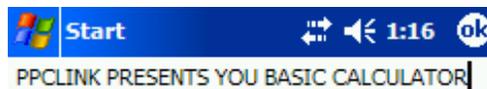

Components in main screen of Calculator Keyboard

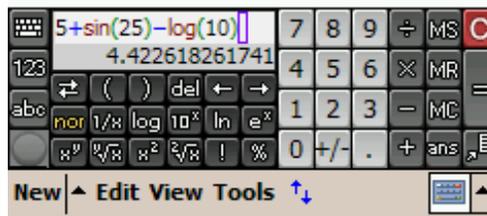

Button	Descriptions/function
	<ul style="list-style-type: none"> • Tap on this button to save result to the current memory store variable
	<ul style="list-style-type: none"> • Tap on this button to recall a value from current memory store variable to the LED
	<ul style="list-style-type: none"> • Tap on this button to clear current memory store variable
	<ul style="list-style-type: none"> • Clears the calculator, and reset any functions
	<ul style="list-style-type: none"> • Tap on this button to show the result of the expression • Ans is the variable to store the current result, used it in repeated operators
	<ul style="list-style-type: none"> • Tap on this button to switch between trigonometric and arithmetic calculator.

5.2.1 Basic Calculator

Basic Calculator with arithmetic and trigonometric modules allows basic arithmetical and trigonometric functions. You can deal with almost formulas and then input them into your document.

☞ On the SIP keyboard panel, tap on the  button, you will see the screen as beside.

To calculate and copy-paste:

Enter expression to the 1st parameter of the **LED** then tap on **{=}** button, you will see the result in the 2nd parameter of the **LED**

1. Enter first number in the LED
2. Select operator (+, -, ÷, ×)
3. Enter next number in the LED
4. Type any remaining operators and numbers
5. Select **{=}**

Simply tap on  button to paste your expression or result to your documents. It will appear on your document within 1 second.

Just tap on switch button  to find Trigonometric tabs.

Examples:

To calculate the expression:
5+ Sin (25) - Log(10)

Please follow steps as below:

1. Enter **5**
2. Select operator **{+}**
3. Tap on switch button
4. Select **Sin**
5. Enter Left Parenthesis **{(}**
6. Enter **25**
7. Enter Right Parenthesis **{)}**
8. Tap on switch button
9. Select operator **{-}**
10. Tap on switch button
11. Select **Log**
12. Enter Left Parenthesis **{(}**
13. Enter **10**
14. Enter Right Parenthesis **{)}**
15. Select **{=}**
16. Then you will see the result is **4.42**

 Basic Calculator allows complicated expression with many calculations on the LED. If the expression is too long, you can use navigator buttons **◀ ▶** to move, the button **del** to delete operand or operator on the LED

Basic functions: The calculator supports below functions:

Label	Descriptions	Label	Descriptions
+	Addition operation	-	Subtraction operation
÷	Division operation	×	Multiplication operation
nor	Normal mode	1/x	Inverse operation
fix	Fix mode	sci	Science mode
log	Base 10 logarithm	10^x	Inverse logarithm operation
ln	Natural logarithm	e^x	Inverse natural logarithm

	operation		operation
x^y	x to the Power of y	$y\sqrt{x}$	yth Root of x
x²	Square operation	$^2\sqrt{x}$	Square Root
n!	Factorial operation	%	Percent operation
Sin	Sine	Sin⁻¹	Inverse Sine
Cos	Cosine	Cos⁻¹	Inverse Cosine
Tg	Tangent	Tg⁻¹	Inverse Tangent
Csc	Cosecant	Csc⁻¹	Inverse Cosecant
Sec	Secant	Sec⁻¹	Inverse Secant
Deg	Degree mode	Π	Pi
Gra	Gradian mode	Rad	Radian mode

 Tap on  button to format displayed result ([Normal](#), [Fix](#), or [Science](#)) Tap on  measurement of plane angle ([Degree](#), [Gradian](#) or [Radian](#))

[5.2.2. Tip Calculator:](#)

 This calculator helps finding Tip amount quickly and exactly. After calculating, you can paste the result to the document immediately. Its interface is very easy and convenient to use. Tip Calculator supports features:

- Quickly itemize bills to split them fairly between friends
- Fast numeric keypad entry for all numeric fields
- Easy to use interface.

☞ On the Basic Calculator, Tap on the Hot menu button, Tip Calculator will appear as below. 

Tip Calculator is used mainly for:

- ✦ Servers
- ✦ Bar Tenders
- ✦ Bell-hops
- ✦ Room Service
- ✦ Taxi drivers
- ✦ And anyone else you tip!

To calculate and copy-paste:

1. Enter values for parameters such as *# People*, *% Tip* and *Bill* amount.
2. Tap on **{=}** button then you will see the result in the LED

Examples:

As you can see on the screen shot above, it is exactly one example of the Tip Calculation. Follow 3 steps to get tip amount:

1. Enter Number of people as 5P
2. Change Percentage to Tip to 20%
3. Fill in the bill total amount as \$100

The results will be displayed immediately. Now we know how much each person needs to pay and the Tip amount.

 Tap on  button if you want to paste the result to your document.

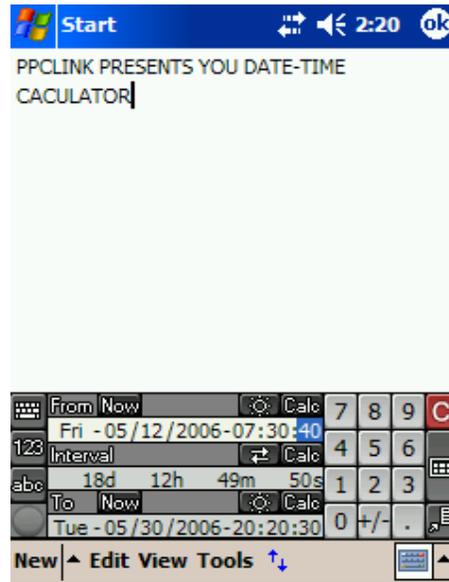

5.2.3. Date-Time Calculator:

📄 This module allows you to calculate date- time formulas very efficiently and then instantly input them into your document.

👉 One the Tip Calculator, Tap on the Hot menu button,  you will see Date-Time Calculator  as beside.

There are 2 options of calculating basing on **exact date** or **number of days**.

Note: Time will be shown in **US** or **European** style depending on your setting in HiKeyboard Options.

To calculate by exact date:

There are 3 bars in this module: **From-Now** bar, **Interval** bar and **To-Now** bar.

Enter time values in 2 out of 3 bars, the expected result will be shown in the rest bar by tapping on  button at the end of the bar you want to calculate the result.

 You can calculate basing on Lunar calendar or Solar calendar by tapping on 

Examples:

To know the Solar Interval between *05/12/2006 at 7h: 30m: 40s* and *05/30/2006 at 20h: 20m: 30s*. Please follow the below steps.

1. Tap on **From** button
2. Enter *05/12/2006 and 7:30:40* in edit box
3. Tap on **To** button
4. Enter *05/30/2006 and 20:20:30*
5. Tap on **Calc** button on **Interval** Bar then you will see the result of *18d-12h-49m-50s* in the box.

Similarly, you can find the Solar future date after 100 days since *05/12/2006 at 7h: 30m: 40s*:

1. Tap on **From** button
2. Enter *05/12/2006 and 7:30:40* in edit box
3. Tap on **Interval** button
4. Enter *100 days*
5. Tap on **Calc** button on **To-Now** bar then you will see the future date of *Sun-08/20/2006-7h: 30m: 40s*.

- To resume the result into days, hours, minutes or seconds by tapping on  button.

- To copy-paste the result, just blacken it and tap on  icon. The whole result will be pasted on the document instantly.

To calculate by number of days

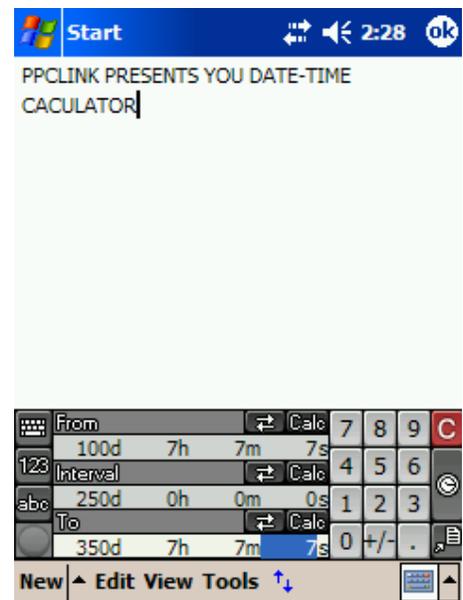

This function allows calculating in number of days, hours, minutes or even seconds.

☞ On the screen of calculating

 by exact date, tap on  button. You will see the screen as beside.

There are 3 bars in this module: **From** bar, **Interval** bar and **To** bar. Enter time values in 2 out of 3 bars, the expected result will be shown in the rest bar by tapping on  button at the end of the bar you want to have the result.

Examples:

To calculate the interval between (100d 7h 7m 7s) and (350d 7h 7m 7s), please follow steps as below:

1. Enter 100d 7h 7m 7s in the **From** edit box
2. Enter 350 d 7h 7m 7s in the **To** edit box
3. Tap on Calc button on **Interval** bar, you will have the result of 250d 0h 0m 0s.

- To resume the result into days, hours, minutes or seconds, click on  button.

- To paste the result, simply blacken it and tap on  icon. You will see the result right there no matter how long or complicated.

5.3. Full Screen Keyboard

 You are tired of using the stylus with tiny keypads? You will satisfy totally with this Full Screen Keyboard. Beside interesting options like SIP, this super keyboard supports:

1. Stylus Free
2. Preview
3. Copy and Paste
4. Focus on finger

How to open

 From HiKeyboard, tap on the  button, you will see the screen as beside.

[5.3.1 Stylus Free](#)

When the keyboard is switched to full screen, you can put stylus away and freely type by hand.

However, what if your dear Pocket has an antenna? Certainly, it will be uncomfortable for your hand while typing!

By giving this full screen keyboard an ability of 180 degrees rotating, you are free from the antenna!

 Go to in HiKeyboard options to enable the rotation feature

[5.3.2 Preview](#)

With normal full screen keyboard, you have only one small box to type in and impossible to preview.

Here with HiKeyboard, you can preview and modify document as long as you want.

 From the full screen keyboard, tap on  button to preview what you have typed in the box.

[5.3.3 Copy and paste](#)

Full screen keyboard supports copy and paste features.

To copy a text, please select it and tap on  button. The selected text will be copy to the clipboard and you can paste it into any editors as you want.

To paste a copied text, please tap on  button.

[5.3.4 Focus on finger](#)

Full screen keyboard has an interesting feature, there will have Kelvin effect which focus on your finger each time you tap on a key.

 Please go to in HiKeyboard options to enable these above features

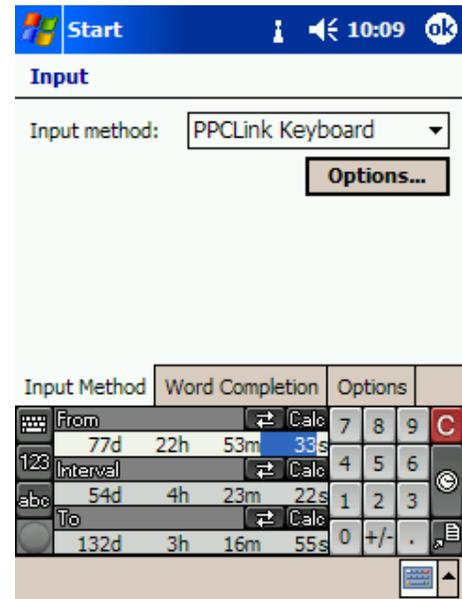

3. Preferences

How to open HiKeyboard Options:

Tap on **keyboard list >> HiKeyboard >> Options**.

This option will allow you to select input method and adjustments in HiKeyboard. After adjusting these parameters, remember to tap on

“Ok” button to save the changes.

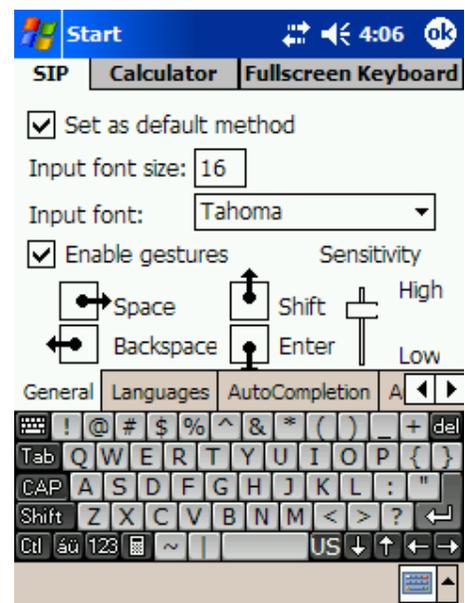

3.1 General Tab:

+ SIP

Set as default method: if you check this feature, it will set HiKeyboard as default input method in stead of Window's keyboard as usual.

Input font size and Input font: It's really convenient for you to decide which font size and font are compatible with the language you use. The adjustments will be displayed on Input keyboard to support you type easily.

Enable gestures: to turn on/off this feature in HiKeyboard

Sensitivity: to increase or decrease the sensitive level when using gesture feature.

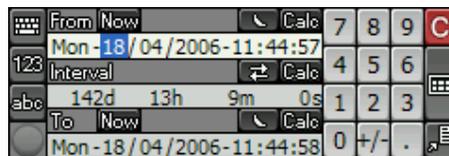

+Calculator

Display & Input mode: US and European.

Help you choose the mode of date and time displayed in calculator only and display results in Basic Calculator.

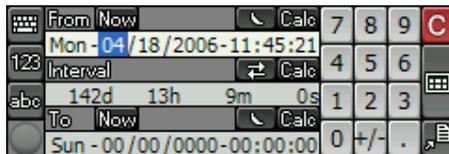

For US style:

Date is displayed by mm/dd/yyyy and number is displayed by 123,456.789.

For European style:

Date is displayed by dd/mm/yyyy and number is displayed by 123.456,789.

+Full screen Keyboard

Target sign when pressed: To turn on/off this feature on Full screen keyboard.

Input font size: To adjust font size in Full screen keyboard's edit box.

Input font: To choose font type in Full screen keyboard's edit box.

Rotate inverse: If you check this box, the Full screen Keyboard will rotate 180° in case of avoiding antenna.

4.2 Languages Tab:

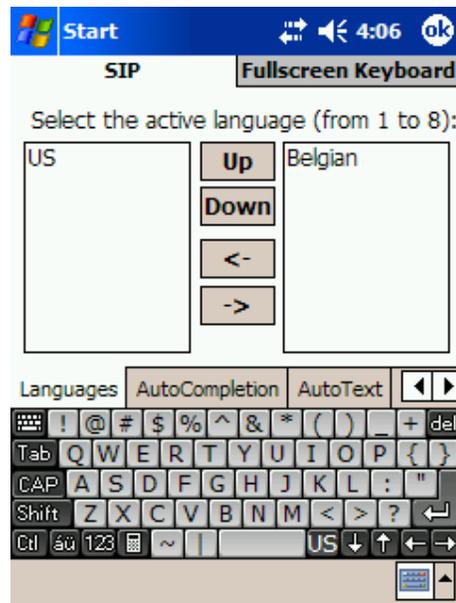

You will see the list of language keyboards, it includes of different language keyboards.

There are two columns:

The left column is active languages list. They will be able to turn over when you tap on the multi language key continuously. You can order them by using Up and Down buttons.

The right one is inactive languages list. This list will keep still.

You can use left and right arrow to choose which one you like.

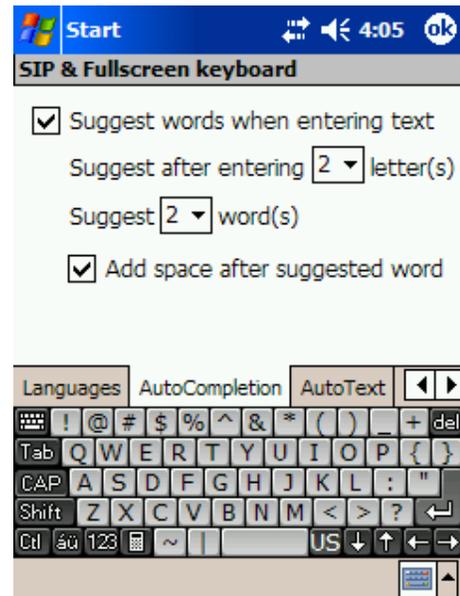

3.3 Auto Completion Tab:

The suggest word will automatically display on keyboard when you enter text, it depends on you to decide how many words will be suggested in a time and you will get the suggest word after how many letters.

Suggest words when entering text: check in here to turn on this feature.

Add space after suggested word: if this option checked then it will automatically added a space after replacing.

This feature now supports for Full screen keyboard.

3.4 Autotext Tab:

One more interesting feature is Auto Text. You can predefine words by abbreviations to save time when typing repeated words or phrase.

Enable auto text: to turn on/off this feature in HiKeyboard

Add a space after replaced word: if this option checked then it will automatically added a space after replacing.

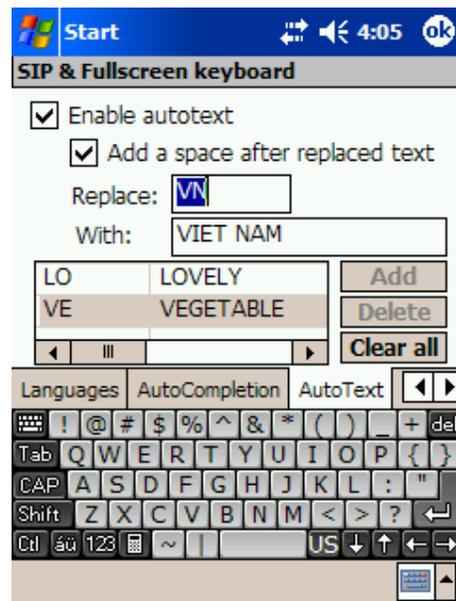

You can create new your *autocorrect word list* by enter abbreviation in "**Replace**" text box

And enter correct word in "**With**" text box then tap on "**Add**" button to save it in the list.

For example:

To define: VN = Viet Nam

1. Type "VN" in "Replace" box.
2. Type "Viet Nam" in "With" box.
3. Tap on **Add** button.

When you type **VN + {Space}**, it will replace VN by "**Việt Nam**" to the document.

3.5 Auto repeat Tab:

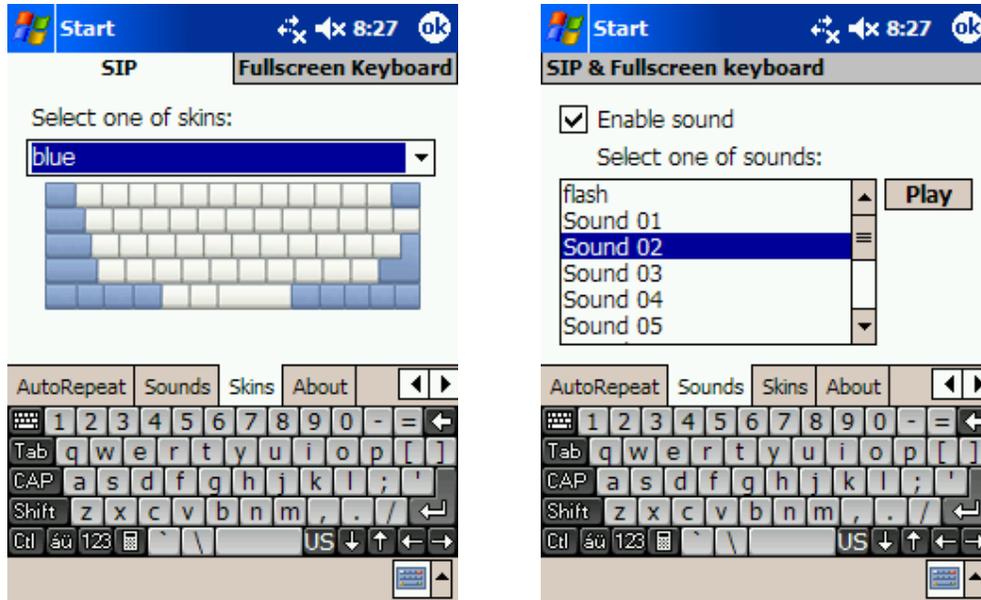

This feature will allow you define speed and number of characters repeated each time tap `n hold.

Enable Auto repeat: Turn on/off this feature in HiKeyboard.

3.6 Sounds and skins Tab:

With this feature, you can show your style here. You will have the tone you want and get the skin you desire to create your own characteristics.

There are many types of sounds and 2 skins to select. You can play sound or preview skins before setting.

3.8 About Tab:

You will register the product here, this page will show your own information and a registration key which you suppose to receive after purchasing the product. Then you will tap on "register" button to formally be owner.

How to buy and register HiKeyboard

HiKeyboard – Your Master Input Method is shareware product and it is free for 14 days while after that you have to register.

To register the software, order the product from:

1. **www.ppclink.com**
2. Pocketgear.com
3. Handango.com

 From the above addresses, we offer the same standard price. However, the price can vary at times between the addresses due to sale promotions.

* If you purchase directly from our websites at www.ppclink.com, you will receive an account by which you can download upgraded versions, submit questions as well as get access to our direct support. After purchasing, you will receive an email from **2CheckOut** and we will send you account information you should use to login to our website: <http://www.ppclink.com/?ppclink=member> to get the Serial Key. In case this is lost, you can re-login and receive a new one.

* If you purchase from Pocketgear, please send your **Receipt** and **Pocket Pc Owner Name** to license@ppclink.com then we will send you the key.

After receiving the registration key, unlock the product follow these steps:

1. Open SIP button
2. Select Option and then select HiKeyboard from "**Input Method**" List
3. Tap on **Option** button
4. Go to **About** Tab
5. Enter your serial key and tap on "Register" button

 The Owner Name on **HiKeyboard** about box is not changeable, if you wish to change the owner name please go to **Start menu >> Settings >> Owner Information**

After successfully completing registration, please write down the name and number and store in a safe place. You will need the registration key if you are going to reinstall the software in a new device or incase your device is hard-reset. You can obtain support information or answers to frequently asked questions at:

<http://www.ppclink.com/?ppclink=product&do=view&id=45>

If you have any further questions, please do not hesitate to contact us at:

PPCLINK Support	support@ppclink.com
