

## RAINBOW MEDIA THEME USER MANUAL FOR POCKETPC

Thank you for purchasing this Theme pack from RAINBOW MEIDA.

---

### Compatibility

Theme pack was developed and tested for **Windows Mobile PocketPC**.

### Prerequisites

- Windows 98/ME/2000/ XP
- For Mac, unsupported, so unzip the exe file using the zip tools in windows
- Acitvesync 3.8 or greater
- Windows Mobile PocketPC with 240\*320 resolution

### Unpacking the Theme Pack

Our pack is supplied as a ZIP archive which contains set of TSK files. Downloaded file should be unpacked **on your desktop computer** to any temporary folder. You may use for that either regular WinZip or another unzip utility file, select any temporary folder and unzip it.

### Installing new Theme in the form of TSK file

TSK files need to be installed manually on the phone. To install, please follow these steps:

#### For PocketPC and Windows Mobile 5 PocketPC

1. Click explore button in ActiveSync. Make sure that Activesync is connected.
2. Copy the TSK file into the folder \IPSM (Storage) \My Documents or Windows.
3. To select the theme for your "Today" screen, tap Start->Settings->Today and click on the appearance tab, then select the theme following instructions on the screen.
4. Select the theme you want from the theme list and click OK

#### Note:

If you have a Pocket PC 2000, which originally came equipped with WindowsCE 3.0, your PDA does not support themes from the manufacturer. This feature was implemented by Microsoft in Windows CE 3.01, and it is a standard feature for this system. Ask your manufacturer whether they can provide an appropriate upgrade for your system or you can use third party software for theme management developed for your model of Pocket PC.

### Uninstalling Theme

To Uninstall or remove the theme from the PocketPC, just delete the .tsk file in the PocketPC.

## How to Change your Theme

To switch the active Theme from already installed Themes, follow these steps:

1. From the Start Screen go to Start->Settings->Today.
2. Use the today setting to select your theme. Tap the browse button to select the background image for today screen.
3. Select Done.
4. Press Home.
5. You will now see the new colors and background image in the Today Screen.

### Troubleshooting / FAQs for Pocketpc:

#### **Q1: I copied the themes to my Pocket PC, and they don't show up on the Start | settings | Today screen!**

A1: The #1 reason for users who have this problem is that the theme files (i.e. the .tsk files) are not copied DIRECTLY to the "My Documents" folder on the Pocket PC. Make sure that the copied .tsk files are in the "My Documents" folder of your PDA, and not under any sub-folders or the storage card. Otherwise, the themes will not be recognized by the Today screen and will not appear in the settings menu. Don't drag the whole "themes" folder on your PC to "My Documents" on your PDA. Instead, go INSIDE the "themes" folder and then select and copy the .tsk files.

#### **Q2: I copied the TSK files in the Pocket PC's "My Documents" folder, but I cannot use them as Today themes. Please help!**

A2: Please make sure that you are having PocketPC 2002 - 2003 Operating System Device. PocketPC 2000 doesn't support themes, so you have to use Third party software for PocketPC 2000 Device.

#### **Q3: I double-clicked on the .tsk files on my PC, but Windows does not know how to open the file.**

A3: The .tsk theme files must be copied to your Pocket PC's "My Documents" folder for them to work. Follow the steps in the "Installation" section of this document to install them.
