MemoManager 1.01
by Suntzu PXP/Lair

MemoManager is a utility designed to make memo handling easier, more fun, and more efficient.

▪ Tap the memo on the list to export it to text file, send by SMS (Treo only), or send by email (Treo only).

Use the TextEditor drop-down to format the text before exporting or importing. The speed of memo manipulation will depend to the amount of characters.

▪ Txt to Memo button is use to import text files from your card into the Memo Pad.

▪ Import or export any text file or memo size defying Memo Pad's 4,096 bytes limit.

▪ Refresh button will top up the memo list to which the latest.

▪ Memo button will launch Palm's native Memo Pad.

NOTE: MemoManager's speed will depend to the amount of memo or text file you are manipulating with.

Version history:

1.0 April 14, 2007

    - Initial public release.

1.01 April 17, 2007

    - Removed the Palm Memo's 4,096 bytes per memo limit. Any length of text or memo can now be imported or exported. Speed depends to the amount of data.
    - Folder icons in the File Browser are now in color.
    - Fixed and improved ProperCase TextEditor.
    - The current text on the text field will be processed by the Text Editor. So when Ucase is selected before Funky2, the text in uppercase will be processed for Funky2 editing. You may add or delete text before or after selecting a TextEditor. Press the Original if you want to edit and format the original text.

DEMO:

Reading the memo database.
