INTRODUCTION

NewsCopier Pro™ for Palm is a RSS newsreader puts the latest headlines, weather, sports, business, and entertainment news right in your hands. It keeps you up-to-date on blogs, bargains, stocks and other news.

You have instant access to the news you are interested in. The program can use your wireless connection, or update headlines when your Device is connected to the Internet.

The program works with variety of different feeds formats: RSS 1.0 (including RSS 0.9, 0.91, 0.92), RSS 2.0 and Atom.

In order to run on Palm device, NewsCopier Pro requires Java runtime to be installed on your Palm device.

The best Java runtime for Palm devices is **IBM's WebSphere Everyplace Micro Environment**.

DOWNLOAD IBM'S WEBSHERE EVERYPLACE MICRO ENVIRONMENT

- Please open this download page in your web browser
<http://www.palm.com/us/support/jvm/>
- Fill in the download form and press “**request download**” button
- On next page read the “**Software License Agreement**”
- The download and installation instructions will be shown on the next page
- Download **WEME571.zip** (1.77MB ZIP File)
- Extract the contents of the zip file using any unzip utility. Note the location where the folder **WEME571JVM** is unzipped to.

INSTALL IBM'S JAVA RUNTIME ON PALM DEVICE

- Launch Palm Desktop. Select **Quick Install** icon.
- Select the correct user name from the User list.
- Navigate to the **WEME571JVM** folder.
- In that folder, open the **JVM \ ARM4T** folder.
- In that folder, select **J9JavaVMMidp20.prc** and **JavaVMCheck_enUS.prc**.
- If you want a non-English version, you should install these files:
 - J9JavaVMMidp20.prc file
 - J9JavaVMMidp20_xx.prc file with your language version ("de" is German, "es" is Spanish, "fr" is French, "it" is Italian, "ja" and "jp" are Japanese, "zh" and "CN" are Chinese)

- JavaVMCheck_xxXX.prc file with your local version
- Drag and drop the selected files to the **Quick Install** window (Main Memory section).
- **IMPORTANT:** IBM Java runtime must be installed in **Main Memory** of your Palm device.
- Perform **HotSync** operation.

INSTALL NEWSCOPIER PRO ON PALM DEVICE

- Launch Palm Desktop. Select **Quick Install** icon.
- Select the correct user name from the User list.
- If you downloaded NewsCopier Pro package as Zip file, please unzip it first.
- Select **NewsCopier_Pro.prc** file.
- In order to install NewsCopier Pro to device **Main Memory**, drag and drop NewsCopier_Pro.prc to Main Memory section of the Quick Install window.
- In order to install NewsCopier Pro on **Storage Card**, drag and drop NewsCopier_Pro.prc to Storage Card section of the Quick Install window.
- Perform **HotSync** operation.

CONFIGURE IBM'S JAVA RUNTIME ON PALM DEVICE

- Open **Launcher** on your device
- Select **Prefs** in the System category
- Open **IBM Java VM** preferences
- Select **NewsCopier Pro** from the drop-down list at the top of the screen. If NewsCopier Pro isn't shown on the drop-down list, select **Global preferences**.
- If your device supports resolution 320x320 or higher, make sure that **Use high resolution coordinates** is checked.
- Increase **Memory Maximum** to at least **4 MB**.
- Increase **Stack Size** to at least **16 KB**.
- Tap **Done**.

RUNNING NEWSCOPIER PRO ON PALM DEVICE

- Open **Launcher** on your device
- Tap **NewsCopier Pro** application icon to run the application

- You may need to switch to the Unfiled category in the Launcher to locate it among your other installed applications.

UNINSTALLING NEWSCOPIER PRO AND THE IBM'S JAVA RUNTIME FROM PALM DEVICE

If you decided to remove NewsCopier Pro from your device, please do the following:

- In the Palm Launcher, select **App | Delete**.
- Delete **NewsCopier Pro** first, before deleting IBM's Java runtime.
- Uninstall **IBM's Java runtime** by deleting the following items from the list:
 - IBM Java VM
 - J9 Exchanger
 - J9 Java Launcher
 - J9 Java Options
 - J9 MIDP Bundle
- Tap **Done** to return to the Launcher.
