

ProfileMD Classic User's Manual

I. Introduction

ProfileMD Classic is a personal health record that can give you instant access to your medical history in case of emergencies, physician office visits, or anytime you need the details of your medical history around-the-clock, anywhere in the world from your PalmOS PDA.

ProfileMD can help reduce medical errors by providing rapid access to accurate medical information.

ProfileMD can help cut down on redundant tests, procedures, treatments, and vaccinations by recording this crucial information.

With **ProfileMD** you never have to worry about...

...where are your medical records now? ...the clinic?the hospital?

...how to access them in case of emergency? ...in the middle of the night?

...how fast could you get your medical records in an emergency? ...hours? ..days?

ProfileMD is featured in Handheld Computers for Doctors by Mohammad Al-Ubaydli and in *"Make your PDA a Health Partner"* by Arlene Weintraub published in the October 7, 2002 edition of Business Week.

This is a list of all devices and simulators ProfileMD Classic has been tested on. If your device is not listed here, it does not mean that ProfileMD Classic is not compatible with your handheld. If you are able to use ProfileMD Classic on a device that is not on this list, please let us know by sending an email to test@e-medtools.com .

Installation

1. Synchronize your PDA with your host computer to back up the data on your device.

2. Open the ProfileMD compressed folder.

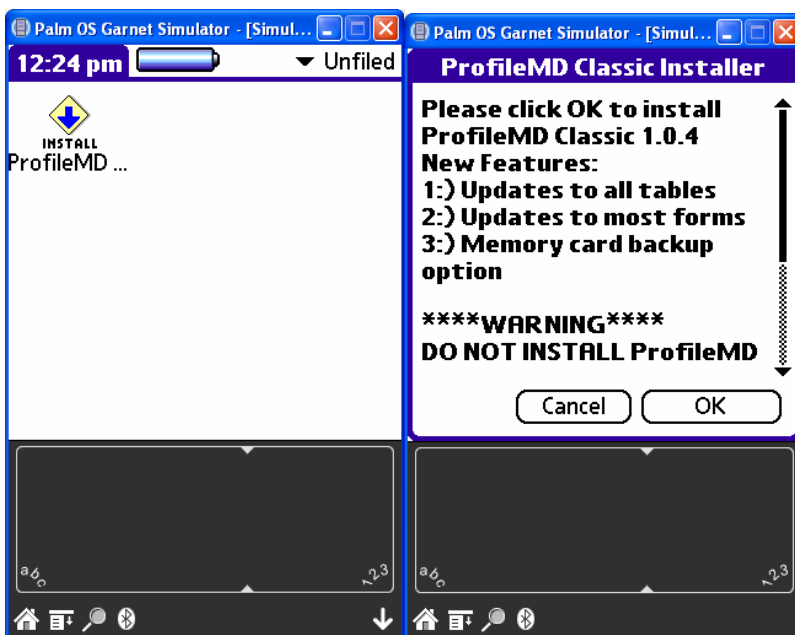

If you are unable to open the folder, you may need an unzipping program such as WINZIP, STUFFIT, or PKZIP to accomplish this step. Download a free demo of one of these popular unzipping programs to accomplish this step.

- a. Download a free demo of WinZip at www.winzip.com
- b. Download a free demo of Stuffit at www.stuffit.com
- c. Download a free demo of PKZIP at www.pkzip.com

3. Click on the ProfileMD-Classic-Installer Icon to start installation of ProfileMD to your PDA.

5. Synchronize your PDA to transfer the file to your PDA
6. Click on the Install-ProfileMD icon on your PDA to launch the installer. Please review the message in the installer for last minute information on ProfileMD Classic. Click the OK button to complete the installation of ProfileMD Classic or Cancel to halt the installation of ProfileMD Classic.

The warning indicates that ProfileMD Classic should not be installed over ProfileMD 2.0 because it will overwrite ProfileMD 2.0.

Manual Installation

A manual install may be required on some PalmOS devices (if the automatic installer crashes) and is required for the StyleTap platform for Windows Mobile.

Please refer to the StyleTap platform instructions for installation to a Windows Mobile device.

1. Synchronize your PDA with your host computer to back up the data on your device.
2. Open the ProfileMD compressed folder.

If you are unable to open the folder, you may need an unzipping program such as WINZIP, STUFFIT, or PKZIP to accomplish this step. Download a free demo of one of these popular unzipping programs to accomplish this step.

- a. Download a free demo of WinZip at www.winzip.com
- b. Download a free demo of Stuffit at www.stuffit.com
- c. Download a free demo of PKZIP at www.pkzip.com

3. Open the Files folder within the ProfileMD compressed folder.

4. Select and install all the files within the Files folder to your PDA. All files are required.

ProfileMD

Updating the ProfileMD Classic Databases

ProfileMD Classic version 1.05 has many changes to the database structure of ProfileMD Classic. We have included a database update program with ProfileMD Classic to allow users of older versions of ProfileMD Classic to gain the benefits of the new database structure.

If you have not used ProfileMD Classic before, you do not need to complete this step, and you can delete the ProfileMD Classic Converter file from your handheld because it will not be needed in the future.

If you have a prior version of ProfileMD Classic installed, you must update the databases to upgrade to

ProfileMD Classic User's Manual

versions 1.05 and higher. To update the databases, click on the ProfileMD Update icon on the Palm desktop. Then press the update button to update the databases. The converter will launch ProfileMD Classic when complete so you can determine if the conversion is successful. After the database update is complete, you can exit to the Palm launcher and delete the ProfileMD Classic Database converter.

If the database update fails, you will not be able to upgrade to version 1.05 due to corruption of one or more ProfileMD Classic databases. The database update program will create backup copies of your databases so they will not be altered during the update process. This will allow you to reinstall ProfileMD Classic 1.04 or lower to recover from a failed database update and regain your data.

ProfileMD Database Update icon	ProfileMD Database update program.	Delete the converter when finished.
		

Upgrading ProfileMD From Obsolete Versions

Some versions of ProfileMD cannot be upgraded with ProfileMD Classic.

ProfileMD 2.x and the original ProfileMD use a different and incompatible database structure which prevents upgrading to ProfileMD Classic. **If you have either of these versions, you cannot upgrade to ProfileMD Classic without complete data loss.** To upgrade from one of these earlier versions to ProfileMD Classic, delete your current ProfileMD (which will erase all your data) and then install ProfileMD Classic version 1.05 or greater.

Identifying ProfileMD 2.x

ProfileMD Classic User's Manual

Identifying the original ProfileMD

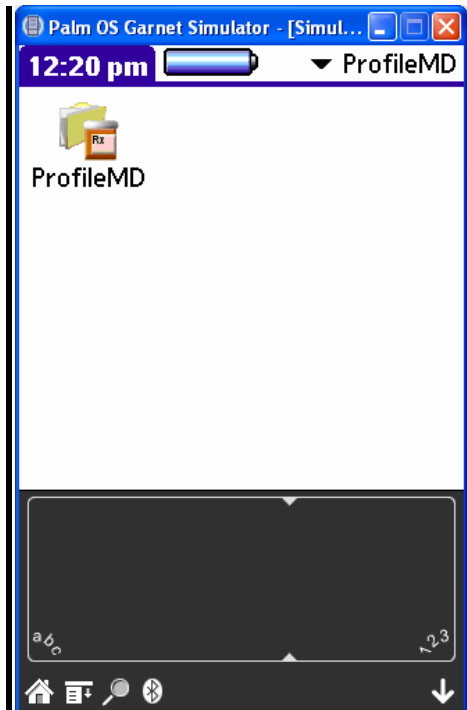

Using ProfileMD

The screen images in this section are from the PalmOS Garnet Simulator. The appearance of the screens may differ slightly on your device. A color Palm PDA is required to view ProfileMD Classic in color.

Switch your PDA **on**. Use the desktop utility to locate the

ProfileMD Classic Icon. Tap the **ProfileMD Classic** icon to open the application.

Hint: ProfileMD Classic will be installed in the ProfileMD category.

ProfileMD Health Record List Menu. Selection of the menu button on PalmOS devices or tapping the title bar while on the Health Record List screen will reveal this menu.

Register will allow you to register ProfileMD Classic.

Security will allow you to turn on or off password protection

Show/Hide private records will allow you to hide records marked as private from view.

Backup to memory card will backup your data to a memory (SD or other) card.

Restore Backup will restore your backed up data. It will overwrite any data added since your last backup.

Memory card on/off will allow ProfileMD Classic to run from a memory card.

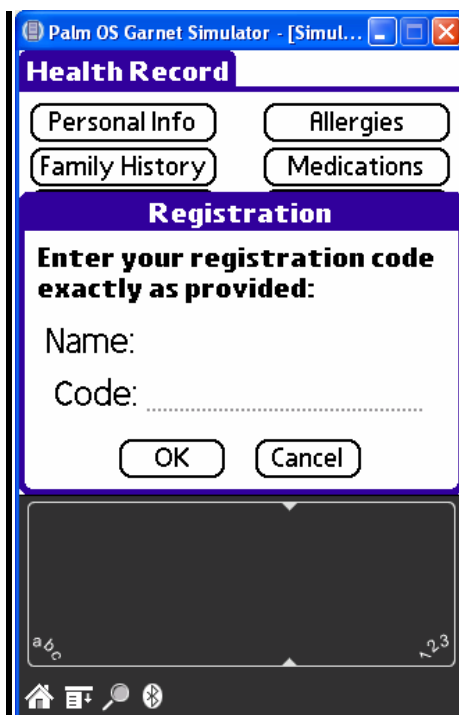

Profile-MD About Screen

This screen contains the copyright and version information for Profile-MD. The address of the ProfileMD website (www.profilemd.com) is also displayed. Clicking the done button will take you back to the previous screen.

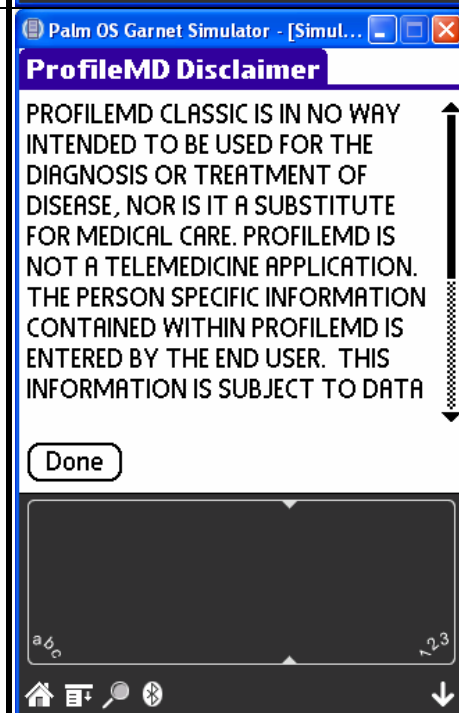

Registration Screen

The registration screen will display your HotSync ID (also know as PalmOS User Name) and provide a blank to enter your registration code. In this case, the HotSync ID is blank (it is a simulator after all). Click OK after typing in your registration code to unlock the program. You can register ProfileMD Classic by sending and email to register@e-medtools.com

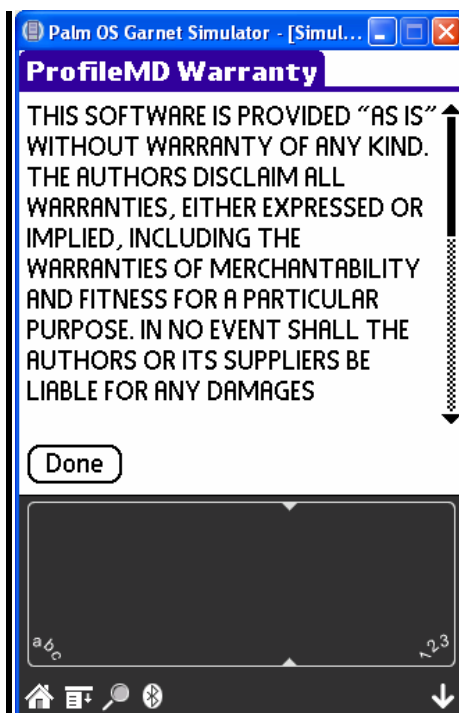

ProfileMD Disclaimer Screen

This screen lists the disclaimer for ProfileMD. Click done to return to the previous screen.

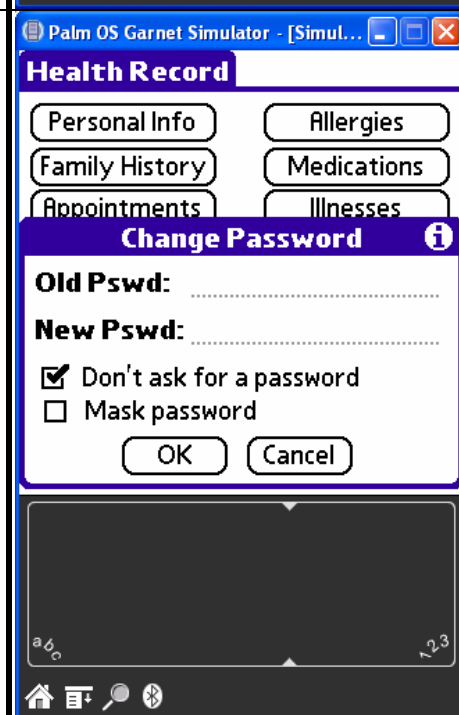

ProfileMD Warranty Screen

This screen lists the warranty for ProfileMD. Click done to return to the previous screen.

Security Screen

This screen will allow you to set a PIN number for access to the data stored within ProfileMD Classic.

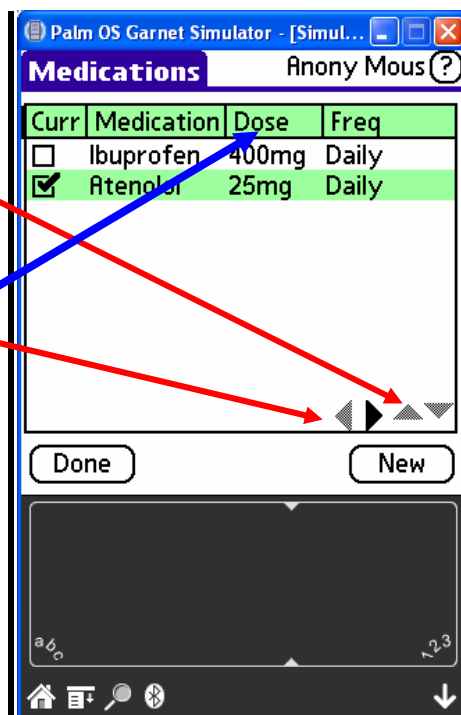

ProfileMD Table Navigation

The tables in ProfileMD Classic can scroll up and down and left and right

This allows more information to be displayed in the table.

Tap a table header to sort the table by that header.

DIA Area

The DIA (Dynamic Input Area), also known as the Virtual Graffiti area, can be closed in ProfileMD Classic to provide more room on the screen to display information.

Please see the manual for your PalmOS device to learn how to close the DIA.

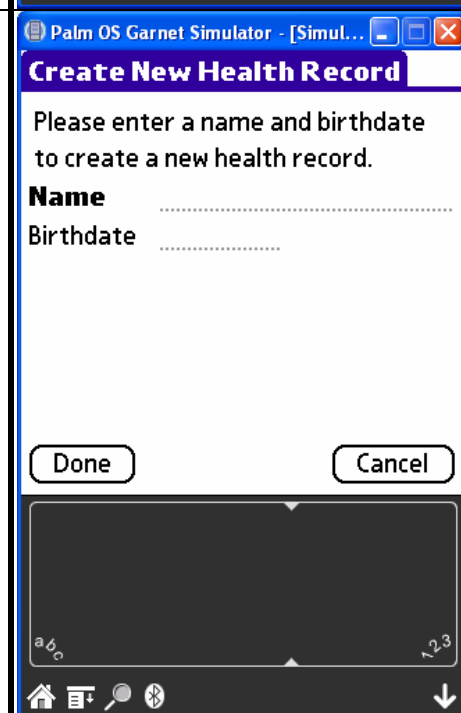

Health Record List

This is a list of all the health records stored on this device. Tap on an entry to open the health record. Press the New Record button to create a new health record.

Create New Record

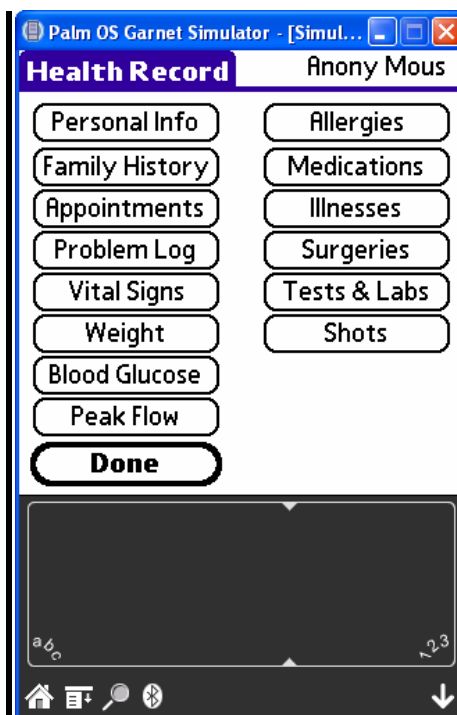

This screen allows you to create a new health record. Fill in the requested information and press done to open the new health record. Press cancel to return to the Health Record List without creating a new record..

Health Record

Tap on a button to open a subsection of this health record. Tap done to return to the health record list.

Hint: You can tell who this health record is for by looking at the name in the upper right hand corner.

ProfileMD Health Record Menu. Selection of the menu button on PalmOS devices or tapping the title bar while on the Health Record screen will reveal this menu. The options under the option heading are the same as in the Health Record List Menu.

Personal Information

This screen can be reached by pressing the Information tab in the Health Record. The done button will return you to the health record screen. The goals button will take you to the goals section.

Hint – the height must be set for the BMI calculation in the weight section to work.

Palm OS Garnet Simulator - [Simul...]

ProfileMD Subfolder Menus. Selection of the menu button in a subfolder of ProfileMD (such as allergies or medications) on PalmOS devices or tapping the title bar while on the Health Record screen will reveal this menu. The options under the option heading are the same as in the Health Record List Menu. The new options under export include

To Memopad – export the current subfolder to the Palm Memopad

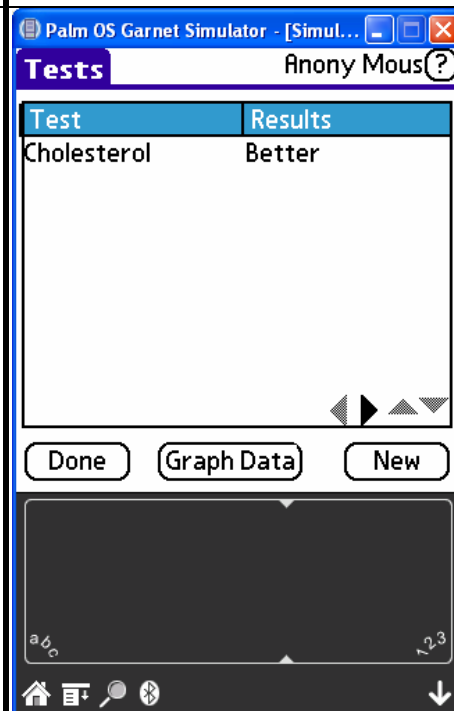

To CSV – export the current subfolder to the Palm Memopad in a CSV (comma separated value) format.

Lab Tests

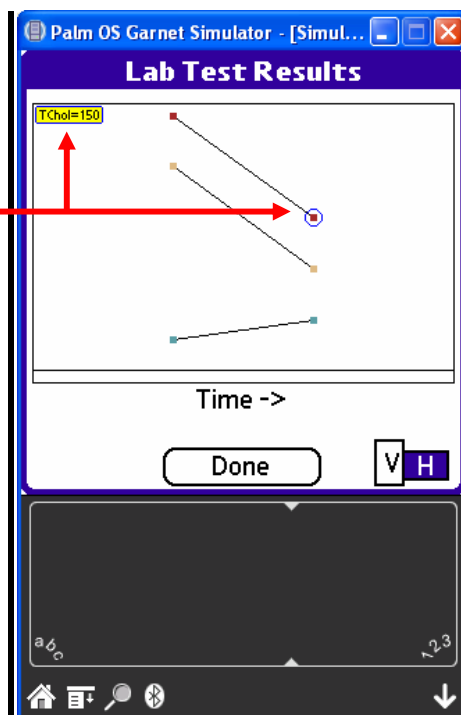

You can list your important lab tests here. You can list as many tests as you wish, limited only by the memory on your handheld computer. Clicking on an entry will bring up the Lab Test Reading screen for more information.

Click new to list a new lab test. Pressing the done button will take you back to the Medical Record Screen.

Lab Test Graph

Tap done to return to the lab test list. Click on V for vertical orientation of the graph, H for horizontal. Tap on individual datapoints to get details about that reading.

Lab Test Reading

For each lab test reading, you can store the test name, the result of the test, the test goal, date of the test, cost, test repeat date, and any notes related to this test. Clicking the done button will return you to the list of Lab Tests. The delete button will delete the current test record.

Allergies

This lists your allergies and the reactions to those medications. Pressing New allows you to add items to the list. Pressing the new button will take you to the Allergy Detail form to enter information on the new allergy. Clicking the done button will take you back to the Health Record screen.

Name	Reaction	Date
Sulfa	Rash	2/25/05

Done New

Allergy Detail

This section will allow you to list any medications you have had allergic or adverse reactions to, the nature of that reaction, the date of the reaction (if remembered), and any notes regarding that reaction you think are important. Clicking the done button will take you back to the Allergy list. Clicking the delete button will erase the current entry.

Notes Really bad rash.

Done Delete

Family Medical History

This section lists your family members and their relationship to you. Clicking on a name will take you to the Family Member Information screen to find out more about that family member. Clicking on the new button will take you to the Family Member Information screen and allow you to enter information about the new family member. Clicking the done button will take you to the Health Record screen.

Family Member Information

This screen allows you to store information about your family members. You can store the name, relationship to you, indicate if they are a maternal (your mother's side of the family) or paternal (your father's side of the family), date of birth, a checkbox to indicate if a person is living or deceased, and a section for notes. Clicking the done button will return you to the Family Medical History screen. Clicking the delete button will erase the current record.

Illness List

This section lists your medical problems and symptoms, and the date of onset (if known). Clicking on an entry will open the Medical History screen to provide more information on that medical problem. The new button will take you to the Medical History Details Screen to create a new entry. The done button will return you to the Health Record form.

Illness Details

This screen allows you to store information about your medical history. You can store the diagnosis, date of diagnosis, physician who treats this problem, and notes related to this medical problem. Clicking the done button will return you to the Medical History List screen. Clicking the delete button will erase the current record.

Surgical History

This section lists your surgeries and their dates. Clicking on an entry will open the Medical History Details screen to provide more information on that surgery. The new button will take you to the Surgical History Details Screen to create a new entry. The done button will return you to the Health Record form.

Surgical History Details

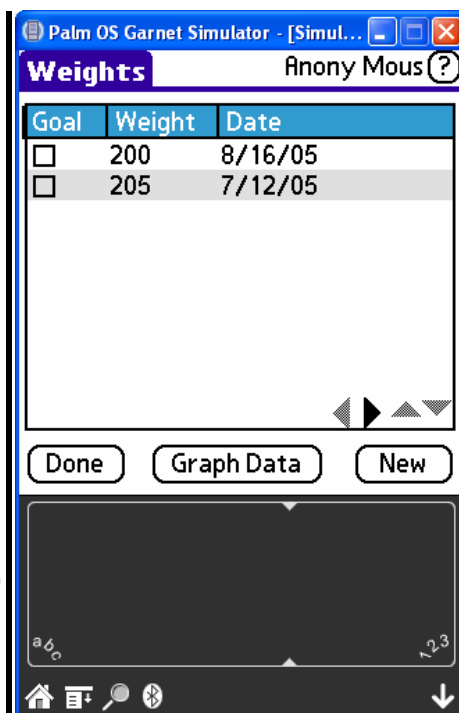

This section enters the details of your surgery including the type of surgery, date of surgery, the surgeon that performed the surgery, and any notes you wish to store related to this surgery. Clicking the done button will return you to the Surgical History List screen. Clicking the delete button will erase the current record.

Weights

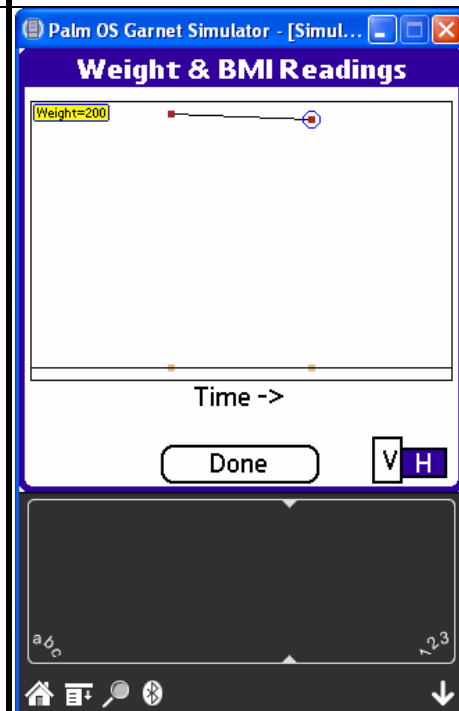

This screen lists your weights, which can be useful for the management of a wide variety of medical conditions such as congestive heart failure, diabetes, and heart disease. Clicking on a weight entry will take you to the Weight Reading screen for more details about that weight. Pressing the new button will create a new entry and take you to the Weight Reading screen so you can enter data. The Graph Data button will display a graph of the weight readings.

Please discuss weight goals with your health care provider(s) to determine which goals are appropriate for you.

Weight and BMI Graph

Tap done to return to the weight reading list. Click on V for vertical orientation of the graph, H for horizontal. Tap on individual datapoints to get details about that reading.

Weight Reading

This screen allows you to enter details for each weight reading including date, time, weight (in either pounds or kilograms) and notes. Pressing the done button will return you to the weights screen. Pressing delete will erase the current entry. Pressing the calculate BMI button will calculate your body mass index if you have a height entered in the Personal Info section and you have selected the units for your weight.

Peak Flows

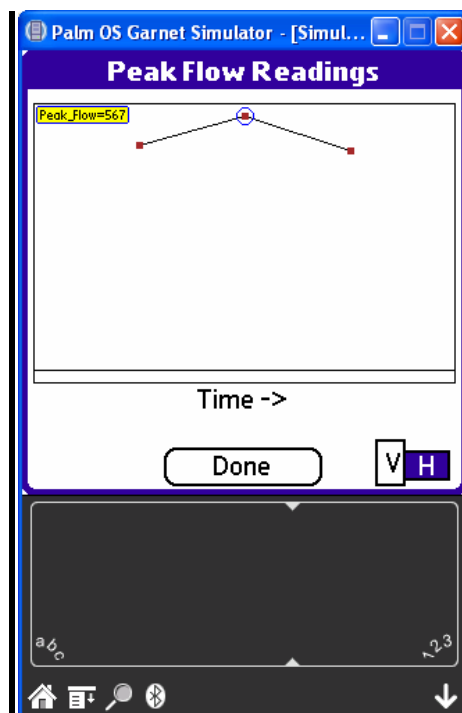

This screen lists your peak flows, which can be useful in the management of asthma and other chronic lung diseases. Clicking on a peak flow entry will take you to the Peak Flow Reading screen for more details about that peak flow. Pressing the new button will create a new entry and take you to the Peak Flow Reading screen so you can enter data.

Please discuss peak flow zones with your health care provider(s) to determine which zones are appropriate for you.

Peak Flow	Date	Time
500	2/25/05	2:00 pm

Peak Flow Graph

Tap done to return to the peak flow reading list. Click on V for vertical orientation of the graph, H for horizontal. Tap on individual datapoints to get details about that reading.

Peak Flow Reading

This screen allow you to enter details for each peak flow reading including date, time, peak flow, activity, and notes. Pressing the done button will return you to the Peak Flow screen. Pressing delete will erase the current entry. The peak flow zone you are in will be marked when you exit the record.

Blood Glucose Values

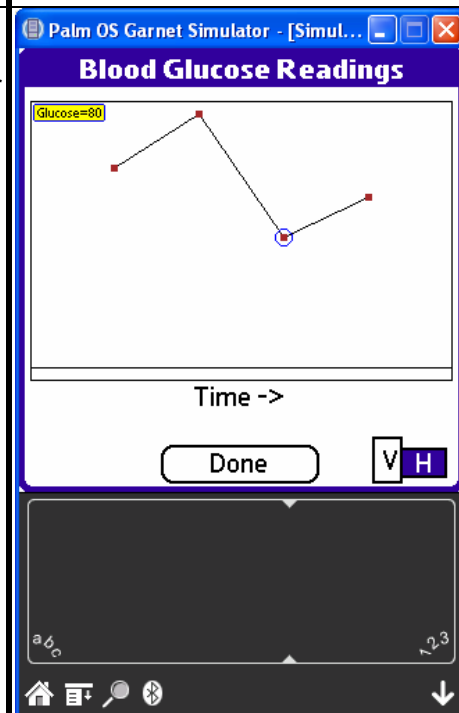

This screen lists your blood sugars, which can be useful in the management of diabetes. Clicking on a blood sugar entry will take you to the Blood Sugar Reading screen for more details about that blood sugar. Pressing the new button will create a new entry and take you to the Blood Sugar Reading screen so you can enter data.

Please discuss blood glucose goals with your health care provider(s) to determine which goals are appropriate for you.

Blood Glucose Graph

Tap done to return to the blood glucose reading list. Click on V for vertical orientation of the graph, H for horizontal. Tap on individual datapoints to get details about that reading.

Blood Glucose Reading

This screen allow you to enter details for each blood sugar reading including date, time, blood sugar, insulin taken, and notes.

Pressing the done button will return you to the Blood Sugar screen. Pressing delete will erase the current entry.

In the blanks under the insulin entry area, you can list other medications taken for diabetes.
