You can register your software at our home site:

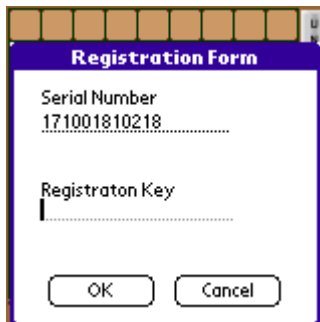

[www.webvisia.com](http://www.webvisia.com)

A screenshot of a 'Registration Form' dialog box. The dialog has a title bar with the text 'Registration Form'. Inside, there are two text input fields. The first is labeled 'Serial Number' and contains the text '171001810218'. The second is labeled 'Registraton Key' (note the typo) and is empty. At the bottom of the dialog are two buttons: 'OK' and 'Cancel'.

The error number and the exact contents of the error message.

A brief description of how we can recreate the error.

Your name and Email address so we can contact you when the bug is fixed.

It is best to report bugs by Email, so that the programmers have a written record of the information they need to solve the problem. As soon as we receive your Email, we will examine the problem, and fix it. Because our programmers are busy creating software, it can take a while for them to reply, but they will release a new version of the software that fixes the bug as soon as they can.

## WV Lines – User Guide

### WV Lines

The aim of the game is to score points by aligning figures of the same shape. When five or more figures are aligned vertically, horizontally or diagonally they disappear. You get points for this.

### New Game

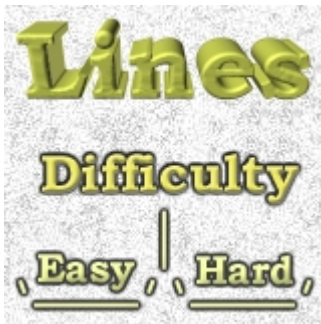

In the main applications screen of your device, tap the Lines icon. The logo screen will appear. Tap it to start the game.

## Choose Your Level

Lines has two difficulty levels – easy and hard. The difference is in the number of figures in the store, which is two or three for each level respectively.

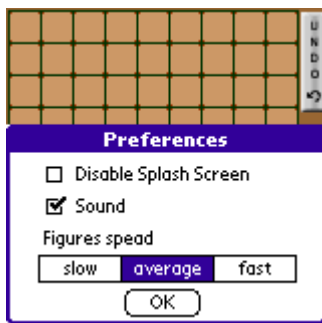

Choose the level that best suits your skills and tap **Easy** or **Hard** to play the game.

## The Sound Option

To switch on the sound of the game, go to **Menu|Preferences** and check the **Sound** box. Alternatively, disable the box to play the game in silence.

If you don't want to see the logo every time you start the game, go to **Menu|Preferences** and check the **Disable Splash Screen** box.

## Play WV Lines

### The Figures

The game has seven types of figures, which differ in shape and color:

### Playing Lines

The Lines' playing field contains 81 squares with particular number of figures, depending on the difficulty of the level you are playing. The game goes in turns. Each turn two or three figures of random shape appear on random places on the field.

You can then move one figure by selecting it and pointing its destination. The figure can move only in horizontal and vertical direction, through unoccupied fields only. If you manage to arrange five or more figures with the same shape in a line (horizontal, vertical or diagonal) they disappear from the field and your score increases. Longer lines are scored higher.

You can use the **Undo** button to go back to the previous turn. If you have made ten or more turns you can use the **Undo** button maximum ten times. You can not use the **Undo** button if you have arranged a line in the previous turn.

## The Store

The store is in the right part of the field and contains two or three figures which will appear in the next turn.

## Scoring

When you manage to arrange five figures with the same shape in a line (horizontal, vertical or diagonal) they disappear from the field and you get 25 points. If you arrange more than five figures with the same shape you get 15 additional points for each one figure over the required five figures.

The game ends when the line under the playing field gets to the end of it. This happens when the figures on the screen are more than sixty.

Think ahead to score higher bonus, and cause chain reactions by hitting multiple sets with one move. To view scores go to **Menu|Game|High Score** or **Menu|Game|High Score** for timed game and the following screen will appear:

No:	Name:	Score:	Diff
1	Neil	100	Easy
2	Kevin Ly	90	Easy
3	Maryann	30	Easy

Tap anywhere to exit this screen.

## **Help**

WV Lines offers some simplified internal help. You can find there some basic information of the rules of the game and its final goal.

To view these tips go to **Menu|Help|Help**. Tap **Done** to quit the screen.

## **The End**

Well, that's all for now. No matter how you play, the lines will keep you busy for hours. Enjoy your time!
