ZInsider is an ultimate file manager for PalmOS platform, and it's easy to use!

Main Features

Supports handhelds running on PalmOS 3.5 or higher.
PalmOS 5 Compatible.
Graphical and Easy To Use user interface.
Support the Virtual Graffiti for using on different devices.
Supports VFS. Multiple expansion cards are supported.
Supports Sony HiRes(320X320)/HiRes+(320X480)/Landscape Mode(480X320).
Supports Sony JogDial.
Supports Palm 5-Way Navigator.
Supports Treo600 5-Way Navigator.
Supports Drag & Drop.
Supports Pop up menu.
Dual-column UI which lists items in the handheld and on the expansion card at the same time.
Batch file operations: Beam, Send, Duplicate, Copy, Move, Delete, Change Attributes, and etc.
Lists ALL items on the handheld and expansion cards:
- Ability to duplicate/delete resources/records/databases/files.
- Ability to delete any protected file within the RAM.
- Ability to create a new database.
- Ability to modify information of databases/files. You even can directly modify the information of a database which is stored on expansion card.

- Ability to view database's resources/records and App Info Block and Sort Info Block, either in internal memory, or on the expansion card.
- Ability to modify information of resource/record.
- Ability to create record in a RAM-based database. Record's size can exceed 64KB.
- Supports viewing various resources, even ability to view version 3 bitmap on PRE-OS5 handhelds. Ability to lists all bitmaps of a Bitmap/Icon Family.
- Ability to view database's resources/records, or the whole database header(including record/resource entries list) in internal memory, as well as on the expansion card. Multiple combination of viewing contents: HEX & AscII, HEX, AscII, BIN & AscII. Very handy!
  Note: Viewing file contents depends on the free Dynamic heap available on the handheld. However, you still can view all resources/records of the database)
- HEX editor supports HiRes/High-density small fonts.
- Ability to launch an application within the internal memory directly.

View VERY detailed information of the system/handheld:
- OS version
- HotSync info
- Device info
- Processor info(Dose not support DragonBall SuperVZ and ARM based processors at the moment)
- Display Info
- Battery Info: Ability to change the Auto-Off period, this setting will be reset after a soft-reset if ZInsider is not in internal memory.
- Memory Info
- Expansion Slot/Card Info

View details of Feature. Lists all Features, and the (possible) owner programs of the features, even the programs are stored in /Palm/Launcher/ directory.
View details of System Preferences. Lists all system preferences records, including saved preferences and unsaved preferences. And you can view the content of any preference. Lists the (possible) owner program of the preference, even the programs are stored in /Palm/Launcher/ directory. You can easier to determine whether the preference is necessary, and delete it with a single tap.
View details of all System Traps' address.
System Error Code query.
System Key Event Watcher.
Creator Finder, which can find the owner/related app basing on a specific CreatorID.
System Alarm Manager.
- You can modify the date and time for each Alarm.
  Directory tree.
- You can " New" " Delete" or " Rename" in the directory tree screen.
- You also can rename for expansion card.
  And much more...

Usage

Selecting items:
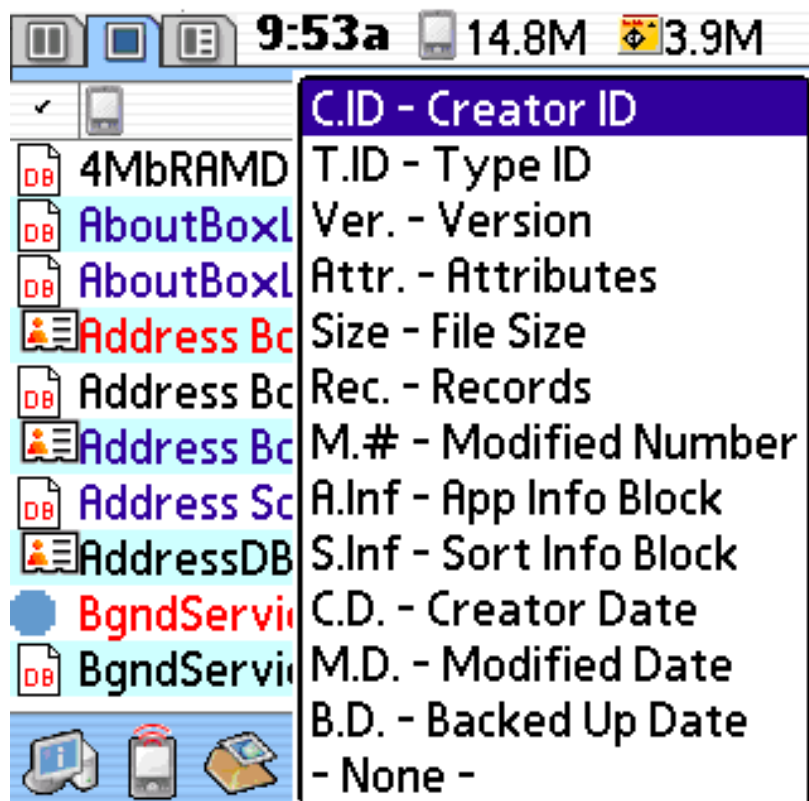

1.Tap on the first title button, then select one of the selection methods.
2.Tap on the item icon and then drag to select several files.

Toggling between internal memory and expansion card: Tap on the second title button for one second, then select handheld or expansion card.

Toggling the item info column: Tap on the third title button for one second, then select one of the item info.

Disclaimer and Legal Stuff

This program is a shareware. If you think this program is useful for you and you would like to encourage us to continue improving this program and writing more useful programs, please refer to the About dialog to find out the website to purchase the software.

Why should I buy this software?

> You think this software is very useful for you, and you want to encourage the author to continue improving this software and develop more useful programs.
> Purchase now and you will receive:
> - Enable the built-in HEX Editor function.
> - Remove the Unlock prompt dialog.
> - Technical support via email.
> - Future update email notifications.

You may distribute this program without modifications and not for profit-making purpose. Please contact us if you want to modify it or use it for commercial purposes.

Purchase and Registration

1. Please refer to the About dialog to find out the website to purchase the software.
2. If you don't receive the unlock code within 7 working days, one of the following coditions might have happened:
   - You had supplied an incorrect email address.
   - Your email account is full.
   - Your email account is no longer available.
   - For some reason, the email of the unlock code is not accepted by your email account(treated as a spam, for example).
   Solutions:
   - Delete some emails from the email account to make sure there's enough free space to receive the email.
   - Register a new email account.
   - Allow receiving the emails from us.
   - Supply to us at least one other email account than the one used when purchased ZInsider.
3. If the Unlock Code dose not work, please be sure that the input and User Name is correct. If you are still failed to unlock your copy of ZInsider, please send the User Name and the HEX string to us.
4. One license is used for one user. If you change to a new handheld without changing the user name, the Unlock Code can work on the new handheld. If you want to use ZInsider with different user names, you need to purchase the extra licenses.

Compatibility

1. ZInsider supports all handhelds which are running on PalmOS 3.5 or higher version. Currently, ZInsider is not compatible with PalmOS Emulator and Simulator.
2. ZInsider is not compatible with SwitchDash 0.4 and lower versions, if you are using SwitchDash, upgrading to SwitchDash 0.44 is strongly recommended.
