

LivePVR Windows Mobile Professional

Release Note

FEATURE ENHANCEMENTS

LivePVR 2.9

- **Supports Windows Mobile 6 Professional devices**
- **Multiple Recording Quality support**
 1. This version now provides option to set the recording quality in the settings screen. Recording qualities supported are listed below. Higher the KHz, higher the size of the recorded file except the GSM quality which is the smallest.
 - a. 8KHz Mono 8-BPS.
 - b. 11KHz Mono 8-BPS.
 - c. 11KHz Mono 16-BPS.
 - d. 11KHz Stereo 8-BPS.
 - e. 11KHz Stereo 16-BPS.
 - f. 22KHz Mono 8-BPS.
 - g. 22KHz Mono 16-BPS.
 - h. 22KHz Stereo 8-BPS.
 - i. 22KHz Stereo 16-BPS.
 - j. 44KHz Mono 8-BPS.
 - k. 44KHz Mono 16-BPS.
 - l. 44KHz Stereo 8-BPS.
 - m. 44KHz Stereo 16-BPS.
 - n. GSM 6.10.

LivePVR 2.8

- **Recorded files organized in different folders**
 2. Phone calls are saved in the folder "\\My Documents\\LivePVR\\PhoneCalls\\[Contact's Name Or Number]" (Depending upon the caller present in the phone's contact or not)
 3. MeetingNote files saved under the folder "My Documents\\LivePVR\\Meetings\\[Date]_[Time]" directory.
 4. Voice recordings are saved inside the folder "My Documents\\LivePVR\\VoiceClips".
- **File names include additional details about the recording**
 1. Recorded phone call's file name convention is "P_[Phone number/Contact name]_[IN/OUT]_[Date]_[Time].wav".
 2. Meeting notes file name convention is "M_[Date]_[Time]_#". '#' signifies the recorded file number for a particular meeting. The first meeting notes for a meeting has the file number will be 1 and the number is incremented for each additional note taken for the meeting.
- **Interface to Manage Recorded files on device**
 1. Locatefile option will now provide option to view different type of recorded files i.e. Phone call, Meeting notes and Voice clips.
 2. Files can be played from this menu and deleted if they are not required.

LivePVR Windows Mobile Professional

Release Note

- **Additional Hotkeys to Stop and cancel recording**
 3. When a phone call recording is going on, press the '1' key for at least 3 seconds to stop the call recording. The recorded file will be saved.
 4. When a phone call recording is going on, press the '2' key for at least 3 seconds to cancel the recording. The phone call recording will stop and the recorded file will be deleted.
- **Support for user to specify recording quality**
 1. Settings screen provides user option to select normal, medium or high quality of recording to record 11 kHz, 22 KHz or 44 KHz frequency.

LivePVR 2.7

- **Hotkey key to start recording in middle of phone call or meeting**
 1. If # key is pressed during a phone call and kept pressed for more than 3 seconds, the Phone Call PVR recording is activated.
 2. If no phone call is in progress, normal voice recorder is activated

User will no longer have to maximize LivePVR program and select the options from the program to do voice recorder and phone call recording.

- **Auto Start at boot**

LivePVR will now auto start at boot time and remain active till user exits from the menu.

- **Buffered recording for Phone Call**

Similar to meeting notes so user does not record all calls but if user feels the call need to be recorded user can press a button and it dumps the pre-push buffer to a file and then start recording from the current position.

- **Integrated Installation program**

The device application installation is now integrated into the installation program. Installation program will:

- Install the PC application
- Install the application on device. If the device is not connected during installation, it will be automatically installed when the device is connected.

- **Always on top for active recording**

LivePVR will run on top, even if the phone is set to "go dark" after a few seconds if recording is in progress. This is to make sure that user stops the recording when not required and not run out of space on the device.

- **Reduction in size of the program**

GIF Images are now used to reduce size of LivePVR program.

BUG FIXES

LivePVR 2.9

- Phone call recording problem rectified for HTC Touch family of devices.

LivePVR Windows Mobile Professional Release Note

LivePVR 2.7
